Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

2. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1-17 drawn to a decorative floor covering classified in class 428, subclass 411.1+.

- II. Claims 18-32 drawn to a method for manufacturing a decorative floor covering, classified in class, 156 subclass various.

4. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention of group I, drawn to a decorative floor covering can be made by another and materially different process. A process is considered “specially adapted” to the product only if the product cannot be manufactured by another process. See MPEP 1893.03. In the instant case, the decorative floor covering laminate can be made by continuously laminating the film layers instead of using heat and pressure.

5. A telephone call was made to Neil Sirota on July 21st to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
